DETAILED ACTION

1. This action is in response to the Preliminary Amendment dated August 23, 1999 (Paper No. 2). Claims 1-7 have been canceled and claims 8-10 have been added. Claims 8-10 are new claims. Claims 8-10 are pending in this Office Action.

2. This application is a Continuation of application Serial No. 08/889,975 filed on July 10, 1997, now U. S. Patent No. 6,295,075 issued on September 25, 2001 to Janay et al.

Drawings

3. The drawings filed on August 24, 1999 are objected and subject to correction of the informalities indicated on the attached "Notice of Draftperson's Patent Drawing Review," PTO-948.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claim 8-10 are rejected under the judicially created doctrine of double patenting over claims 8-10 of U. S. Patent No. 6,295,075 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

Art Unit: 2155

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: An improved technique of allowing terminal emulators to communicate with remotely located hosts comprises the steps of communicating first with a server which downloads communications software to the terminal emulator. The communications software is then utilized to communicate with the host, and screens of information downloaded by the host are recognized by the NC terminal. The terminal then communicates with the server determine how to present such downloaded screens to a user.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
